

STARBAR® PRODUCT CATALOG

HARDWORKING INSECT CONTROL

A COMPREHENSIVE APPROACH TO INSECT CONTROL

Explore Starbar® baits, traps, sprays, and specialty insect control solutions designed to support effective pest management across a wide range of environments.

BAITS

- Attracts flies to feed using sugar-based baits and proven attractants
- Offers baits with diverse attractants, active ingredients, and modes of action
- Multiple application options for flexible placement and usage
- Rotation-ready solutions to support integrated pest management (IPM) and resistance management practices

SPRAYS

- Versatile spray options for use on animals, in structures, and around the operation
- Easy-to-apply formulations designed for reliable fly and insect control
- Broad-spectrum solutions to help manage a wide range of labeled insect pests

TRAPS

- Designed around fly behavior to attract flies where they feed, mate, and rest
- Flexible placement options for use on the ground, along structures, or suspended overhead
- Available in a variety of sizes and options including sticky traps, odor and pheromone traps

SPECIALTY

- Targeted specialty solutions for biting flies, fire ants, and mosquitoes
- Protect livestock and workers around your operation

BAITS

Starbar® products offer a comprehensive line of fly bait solutions, including granules that can be scattered or used in bait stations. Starbar® products also provide baits that can be sprayable and paintable for those harder to reach places. When used near the ground, Starbar® products take advantage of fly foraging behavior to set the standard for effective fly control.

Because flies feed close to the ground, our scatter baits are built on a sugar base with added attractants to encourage feeding. Ideal for both large-scale and smaller operations, Starbar® fly baits are scientifically designed to protect agricultural facilities. They can also be rotated as part of an integrated pest management program to help prevent fly resistance.

AVIATOR® FLY BAIT AEROSOL

Aviator® Fly Bait Aerosol is the ultimate solution for effective fly control. It kills house flies, lesser house flies, dark-eyed fruit flies, and vinegar flies. With a simple spray that targets hard-to-reach places, like walls and surfaces around ag operations and rural settings, it excels at controlling flies where traditional baits can't reach. Its versatility makes it perfect for deployment inside pig barns, chicken coops, poultry houses, horse stables, and cattle and dairy barns. Best used on non-porous surfaces to attract flies.

CYANAROX® INSECTICIDAL BAIT

Cyanarox® Insecticidal Bait is a ready-to-use granular bait to control house flies and contains the active ingredient cyantraniliprole. It is both highly attractive and highly effective in controlling house fly populations. It can also be used as a cockroach bait. Cyanarox® Insecticidal Bait can be used indoors in a bait station and outdoors in common areas where high fly densities are most apparent. Cyanarox® Insecticidal Bait can also be used in rotation with QuikStrike® Fly Bait, Golden Malrin® Fly Bait and DuraStrike® Fly Scatter Bait to form a formidable, four-pronged rotational approach to manage against resistance.

GOLDEN MALRIN® FLY BAIT WITH MUSCAMONE® FLY ATTRACTANT

The standard in fly baits for more than 50 years, Golden Malrin® Fly Bait draws flies in to feed with Muscamone® fly attractant. Golden Malrin® Fly Bait features the active ingredient methomyl to help offer precise control. Golden Malrin® Fly Bait has been reclassified by the U.S. Environmental Protection Agency as a Restricted Use Pesticide (RUP), effective as of July 29, 2025.

QUIKSTRIKE® II FLY ABATEMENT STRIP

The QuikStrike® II Fly Abatement Strip contains a triple-action attractant and an active ingredient that kills flies quickly after they begin to feed. Flies feed low and rest up high. Simply place the device 4 ft. from the ground or lower, or in a bucket for ideal control. The QuikStrike® II Fly Abatement Strip can be used throughout any operation (including milking parlors) where flies are a problem.

TRAPS

Starbar® products offer an extensive line of fly traps and attractants, including attractants designed to target specific fly behaviors. You can count on the precise design of each trap to provide effective fly control.

Starbar® fly traps and attractants help you control flies where they feed, mate, and rest. For best results, place traps where flies are most active: on or near the ground where they feed, along fence lines and walls where they mate, and from ceilings or rafters where they rest—out of reach of people and livestock. Starbar® fly traps are ideal for both large-scale and smaller operations and can be used as part of an integrated pest management program.

BITE FREE™ STABLE FLY TRAP

Bite Free™ Stable Fly Traps are scientifically proven to help effectively trap flies that bite and get a blood meal from your animals. When sunlight shines through, flies are drawn to the shimmering, translucent surface. Bite Free™ Stable Fly Traps have a weatherproof adhesive surface that won't melt or wash away. These traps are easy to use and work without insecticides or pungent attractants. Best used 3-4 ft. off the ground, in direct sunlight.

TRAPS

FLY TERMINATOR® PRO FLY TRAP

A large capacity 1 gal. jug trap and attractant, Fly Terminator® Pro Fly Trap comes with a plastic top that won't rust when exposed to corrosive environments. The reusable plastic jug traps thousands of flies, and its sturdy handle makes the trap easy to hang. Comes with two, 30 gm. water-soluble attractant pouches. Hang trap within 4 ft. of the ground or place on the ground.

FLY TRAP ATTRACTANT REFILL

An exclusive formula that contains four different attractants flies can't resist in a water-soluble pouch format. It can be used with Fly Terminator® Pro, Captivator® Fly Trap and other reusable water-based traps. Each package contains eight 30 gm. water-soluble pouches.

MILK JUGG™ TRAP

Turn ordinary plastic milk jugs into economical, effective fly traps. A Milk Jugg™ Trap pack comes with two escape-proof plastic tops and attractant. Add water and attractant, then pop the top and the milk jug is ready to trap. Milk Jugg™ Trap can be conveniently displayed in stores by sitting flat on shelves, stacked on shelves, or by hanging from a peg. Hang trap within 4 ft. of the ground or place on ground in sunlit area.

TRAP 'N TOSS™ DISPOSABLE FLY TRAP

This handy, disposable fly trap – complete with its own attractant which activates by adding water – holds thousands of flies. Trap 'N Toss™ Disposable Fly Trap can be hung wherever flies are a problem. When it fills up with flies, just toss it out. Hang trap within 4 ft. of the ground or place on ground.

SPRAYS

Starbar® insect sprays are easy to use and can be applied in many areas throughout an operation. Some can be used directly on-animal for livestock fly control, while others can be used in and around structures for proven fly and insect control.

Starbar® insect sprays can be applied to various places in, on, and around your operation. Application sites include pastures and yards, on animals, and in buildings and with a wide variety of solutions, these products help to fight a wide variety of insects.

INHIBIDOR™ INSECTICIDAL POUR-ON

Inhibidor™ Insecticidal Pour-On is a ready-to-use solution for beef cattle and calves to control chewing and sucking lice, and kill horn flies, horse flies, and deer flies. It is a combination insect growth regulator, adulticide, and synergist. Also, kills ticks by direct spray dilution application.

PROD. #	PROD. DESC.	CASE QTY.
100545399	64 oz. bottle	8
100545430	2.5 gal. bottle	2

LAMBDA 9.7 CS

Lambda 9.7 CS is an adulticide labeled for control of a variety of insects as well as being approved for a wide range of application sites. Advanced protection technology prevents the active ingredient from breakdown in heat and UV exposure, resulting in greater residual control and reduced retreatments.

PROD. #	PROD. DESC.	CASE QTY.
100208957	1 qt. bottle	6

PBO-8® SYNERGIST

A synergist for many classes of insecticides, PBO-8® Synergist improves efficacy, allowing lower use rates and preventing resistance. It works by blocking the production of mixed-function oxidase enzymes, which insects use to metabolize an insecticide's active ingredients.

PROD. #	PROD. DESC.	CASE QTY.
100208975	1 gal. bottle	4

PROLATE/LINTOX-HD™ INSECTICIDAL SPRAY & BACKRUBBER FOR LIVESTOCK

Diluted and used as a spray or in a backrubber, the powerful active ingredient in Prolate/Lintox-HD™ Insecticidal Spray & Backrubber for Livestock kills a variety of listed insects. It can be used for treatment of horn flies on non-lactating cattle or for lice and sarcoptic mange mites on swine. It also controls ticks.

SPRAYS

PYRONYL™ CROP SPRAY

A broad-spectrum insecticide for use in dairy, livestock, and poultry operations, Pyronyl™ Crop Spray is an insecticide formulated for surface spraying, misting systems, and on-animal uses. The active ingredients in Pyronyl™ Crop Spray offer dual modes of action with pyrethrins as a sodium channel inhibitor and PBO as a cytochrome enzyme blocker.

STARBAR® E-PRO ADULTICIDE SPRAY

Formulated for residual pest control, Starbar® E-Pro Adulticide Spray is an insecticide that can be applied in and on buildings, structures, and their immediate surroundings. The versatile label applications of Starbar® E-Pro Adulticide Spray include use as a livestock spray.

SPECIALTY INSECT CONTROL

Starbar® specialty products support fly, fire ant, and mosquito control across livestock operations and surrounding areas. Our portfolio includes fly control solutions that work as feed-through solutions, helping interrupt the development of flies in manure from beef and dairy cattle, calves, breeding stock, and show animals. We also offer bait options to help control fire ants in pastures and around the property, along with mosquito control solutions for standing water and outdoor areas around the backyard.

CLARIFLY® ADD-PACK FLY CONTROL

Over 96% effective at ending flies' life cycles at the larval stage.* Help stop irritating, disease-spreading flies with the daily addition of ClariFly® Add-Pack Fly Control for calves to your whole milk or milk replacer. It contains a larvicide that works as a feed through, passing into calf manure where flies lay their eggs. It's fly control that starts with your calves to benefit your whole operation. Also, it has a whey carrier, so it mixes well into milk. Use ClariFly® Add-Pack Fly Control for calves in whole milk or milk replacer as part of an integrated pest management program to help reduce fly populations in calf environments.

100550379	15 lb. bucket	1

EXTINGUISH® FIRE ANT BAIT

Extinguish® Professional Fire Ant Bait contains (S)-methoprene, an insect growth regulator (IGR) that affects a fire ant queen's reproductive abilities. As existing workers die naturally, they are not replaced by a new generation. The queen eventually starves to death and the entire colony is eliminated.

PROD. #	PROD. DESC.	CASE QTY.
37970	25 lb. bag	1

EXTINGUISH® PLUS

Extinguish® Plus fire ant bait combines two active ingredients to control fire ant infestations. Approved for use in rangeland** and pastures, the IGR sterilizes the queen and prevents rebound, while the adulticide kills problem worker ants upon ingestion.

ONE BRAND. VARIOUS INSECT CONTROL SOLUTIONS.

Insect control starts with Starbar® products. For over 65 years, the Starbar® lineup has grown to feature products that can do more to fight flies, fire ants, mosquitoes, cockroaches, ticks, lice, and other parasitic pests that can affect your operation. Visit our website at www.StarbarProducts.com to find the right solution for your operation.

For more information about the products in this catalog, visit www.StarbarProducts.com, contact your local distributor, or call 800.347.8272.

STARBAR® PRODUCTS AS PART OF AN INTEGRATED PEST MANAGEMENT PROGRAM

A comprehensive IPM (Integrated Pest Management) program is built on three key phases: planning, implementation, and evaluation. The planning phase helps operators understand the extent of their insect problems and chart a proactive course of action rather than simply reacting to issues as they arise. During implementation, a multi-method approach is executed to deploy targeted insect control tactics and reduce infestations on the property. Finally, the evaluation phase ensures long-term success through regular monitoring, assessing program effectiveness, and adapting strategies as needed to maintain optimal results.
